A Local Comprehensive Approach to Reducing Infant Mortality

October 11, 2017

Erika Clark Jones, Executive Director, CelebrateOne
Alicia Leatherman, Director of Strategic Initiatives, CelebrateOne
Priyam Chokshi, Director of Community and Legislative Strategies, CelebrateOne
Overview

1. Collective Impact Model
2. Inclusive Structure
3. Our Focus – Our Partners
4. Progress to date

A place based, collective impact initiative to reduce infant mortality in Central Ohio
1. Intentional From the Start

The Launch & Political Will

• Our collective impact initiative started with the Greater Columbus Infant Mortality Task Force in 2013 by then Columbus City Council President, Andrew J. Ginther.

• Multisector representatives from across community for over 6 months to understand the challenges and examine best practices across the nation.

• Infant Mortality Task Force Report (June 2014) was released with 8 recommendations

• CelebrateOne was created in November 2014 to carry out the task force recommendations.
2. Inclusive Structure

What Works Cities | Bloomberg Philanthropies

THE KRESGE FOUNDATION
The Challenge: three infants die each week in Columbus.

This personal tragedy for families is also a disturbing statistic for Columbus that signals a significant gap in our safety net affecting the overall health, vitality and quality of life in our community.

CelebrateOne Goals

- **40%** Reduction in Infant Mortality Rate by 2020
- **50%** Decrease in Racial Disparity Between African American and White Babies by 2020

• Reach
Place Matters – Our Focus

- Infant mortality affects our entire community
- Rates below 4 deaths per 1,000 live births in some neighborhoods, above 20 deaths per 1,000 births in others
- Rates are highest in the most vulnerable neighborhoods
Investing in what works

Addressing Disparities in High Risk Neighborhoods

Improving Women’s Health Before Pregnancy

Improving Reproductive Health Planning

Increasing Prenatal Care for High Risk Families

Ensuring the Highest Standards of Perinatal Care

Reducing Maternal and Household Smoking

Promoting Safe Sleep Practices for Infants
Our Progress
INFANT MORTALITY: July 2017

Infant mortality - or the death of a baby before his/her first birthday - is a critical indicator of community health. Every year in Franklin County, approximately 150 babies die before their first birthdays. While national infant mortality rates are decreasing, in 2014, Ohio ranked 12th worst in the nation for overall infant mortality. Additionally, Black babies in Ohio are dying at over twice the rate of White babies. In Columbus and Franklin County, much of this disparity is driven by babies being born too soon and too small, as well as babies being placed to sleep on an unsafe sleep surface. This monthly report provides a snapshot of the most up-to-date data on infant death and selected birth indicators. The numbers are not finalized and some rates may vary widely from month-to-month. The report is meant to be used as a discussion tool, not a historical record. For a detailed look at trends for recent years, please refer to our Quarterly Summary of Infant Death and Birth Indicators.

DEATHS

16 babies died

SLEEP-RELATED

0 were sleep-related infant deaths

DISPARITY

This month, 56% of infant deaths were to Non-Hispanic Blacks (NHBs), even though only 30% of births were to NHBs.

AGE

94% died before reaching 28 days of age (Neonatal)

6% died between the ages of 28 days and 1 year (Post-Neonatal)

GENDER

The infant death Male to Female ratio was...

BIRTHS

1,619 babies were born, of which...

11.4% were Preterm births*

MoD® 2020 goal <6.1%

9.7% were Low birth weight births*

Hi® 2020 goal <7.8%

*Percentages are based on births with available data: 1,619 for preterm and 1,619 for low birth weight births

ABOUT THE DATA

- All analyses is completed by the Office of Epidemiology at Columbus Public Health; ODH specifically discloses responsibility for any analyses, interpretations or conclusions.
- All current and historical figures are preliminary and subject to change as new/updated information is received.
- Finalized and preliminary (2016-2017 YTD) death data, except for sleep-related deaths, are provided by the Ohio Department of Health, Office of Vital Statistics. Sleep-related death data are provided by the Franklin County Child Fatality Review.
- Finalized and preliminary (2017 YTD) birth data are obtained from the Ohio Department of Health (ODH) Secure Data Warehouse.

Notations:

- MoD® = March of Dimes
- Hi® = Healthy Infant
- ODH = Ohio Department of Health
- NHB = Non-Hispanic Black
- NHW = Non-Hispanic White

Definitions:

- Low Birth Weight Birth: A baby weighing less than 2,500 grams at the time of birth.
- Preterm Birth: A baby born less than 37 completed weeks of gestation.
- Sleep-Related Infant Deaths (also called Sudden Unexpected Infant Deaths, or SUIDs) - include deaths categorized as 1) accidental suffocation, positional asphyxia, or overlay, or 2) Sudden Infant Death Syndrome (SIDS), or 3) undetermined cause.
Year-To-Date Infant Death and Birth Indicators, Franklin County, OH (9/2017)

INFANT MORTALITY: 2017 (January-July)

DEATHS

88 babies died

MORTALITY RATE

The infant mortality rate (IMR) was 8.3 infant deaths per 1,000 live births, which is higher than the HP 2020 goal of <=6.0.

SLEEP-RELATED

7 were sleep-related infant deaths (1 out of every 13)

8.0%

8.0%

GENDER

The infant death Male to Female ratio was...

1 males to 1 female

AGE

75% died before reaching 28 days of age (Neonatal)

25% died between the ages of 28 days and 1 year (Post-Neonatal)

DISPARITY

NHW IMR 4.71

NHB IMR 15.61

Overall IMR 8.3%

Non-Hispanic Black (NHB) infants are 3.3 x more likely to die than Non-Hispanic White (NHW) infants.

This year, about 56% of infant deaths were to Non-Hispanic Blacks (NHBs), even though 30% of births were to NHBs.

BIRTHS

10,637 babies were born, of which...

10.7% were Preterm Births with a HP 2020 goal of <=8.1%

9.4% were Low Birth Weight Births with a HP 2020 goal of <=10%.

Notations:

IMR = Infant mortality rate per 1,000 live births.

NHW = Non-Hispanic White

NHB = Non-Hispanic Black

HP = Healthy People

Key:

NA: Not Applicable

Output: Data Not Available

Definitions:

Low Birth Weight: A baby weighing less than 2,500 grams at the time of birth.

Preterm: A baby born less than 37 completed weeks of gestation.

Perinatal Quality
Engaging, educating and empowering

In 2016, CelebrateOne and its partners expanded efforts to connect the disconnected by distributing tens of thousands of fliers, postcards and brochures offering tips and information about everything from reproductive health and prenatal care to safe sleep.
Forthcoming Efforts
Smart Columbus - Overview

- Columbus competed against 77 cities nationwide to win the Smart City Challenge in 2016.

- Address major community challenge – Infant Mortality
  - Non-emergency medical transportation

- Multiple national and local partners
  - Sidewalk Labs
  - Franklin County
Smart Columbus
Non-Emergency Medical Transportation - Goals

- An intuitive experience
- A reliable ride
- An effective system
Smart Columbus
Non-Emergency Medical Transportation – Next Steps

- Define success metrics
- Timeline
- Design Details
  - Common Payment System
  - Integration with doctors’ offices
  - Car Seat Availability
  - Address confirmation
- Scalability & Sustainability
Policy - Overview

- Engage, mobilize and target policy and advocacy opportunities in Columbus and Franklin County.

- Align strategies and target supportive resources across sectors to improve health disparities.

- Address current state and federal bills that impact maternal and infant health and CelebrateOne programs.
